COFE — PEACE FOR LIFE

OVERVIEW

COFE 4G/4G+WIFI (Also Compatible with 5G SIM Cards), offers support for LTE CAT4~6 and IEEE802.11b/g/n WLAN standards, along with IEEE 802.3 support, delivering exceptional wireless access and integrated routing capabilities.

- Automatic internet access through plug-and-play.
- Wide power input for a range of voltages.
- Outstanding reliability, cost-effectiveness, & minimal power consumption.

COFE also incorporates a comprehensive network protocol, combines various standard interfaces, and offers compatibility with multiple drivers (including Windows, Linux, and Android) and software functionalities.
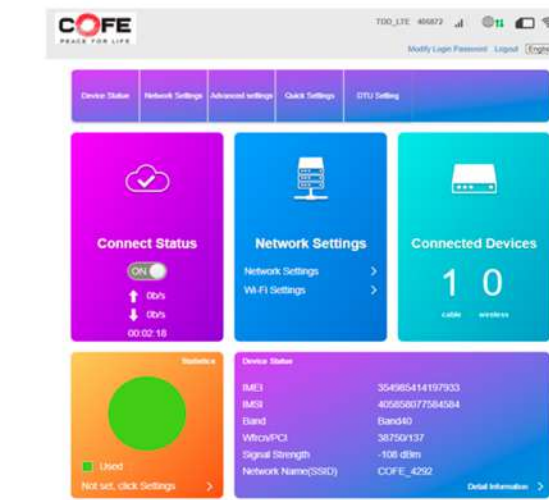

It can be used in various M2M applications, such as video surveillance, digital transmission DTU, unattended shared devices, and other data communication scenarios that demand quick deployment.

COFE primarily offers the following interfaces: USB Power interface, Ethernet interface, Soft Reset button, and RF Interface.
